

PaperVision® Forms Magic Technology

What if you could “magically” **classify** forms and **extract** the data you need?

Eliminate manual steps

29% of businesses are processing more than **1,000 forms per day** (250,000 per year)
- AIIM, 2012

88% of businesses scan forms, but **only 32%** do text recognition.
- AIIM, 2012

55% of all forms are hand keyed
- AIIM, 2012

The Forms Magic technology (FM technology) automatically classifies documents into types and extracts critical data to speed business processes and help you make better decisions.

ECMNOW! takes you from **manual** to **automatic**.

Efficiently
identify and classify.

Classification accuracy ensures **control**.

Data extraction saves **money**.

THAT'S **EFFICIENCY** NOW

TAKE **CONTROL** NOW

THAT'S **MONEY** NOW

“ PaperVision Forms Magic has streamlined our client’s information management services. Sorting through documents prior to scanning is no longer required, and the system automatically extracts all the data needed. As a result, **business moves faster and more effectively**. The system is great! ”

“ PaperVision Forms Magic has revolutionized our AP processes! We’ve been able to **cut our invoice processing time by over 75%**. ”

MSI saves more than \$676,000 annually!

Bruce Rector
President
MuniMetriX Systems Corp.

Customers of the FM technology have **averaged classification accuracy above 90%**, resulting in less time spent manually reviewing and resorting documents.
